HIGH PERFORMANCE LUBRICANTS

Product:	Semi Synthetic 5w/30 ACEA A1 B1
Product code:	(PLA530199)
Revision:	Version 1 2018
Product Description:	

5W-30 Semi Synthetic Engine Oil is a fuel-efficient multi-grade engine oil manufactured from a precisely balanced blend of top-quality mineral and synthetic base stocks and performance enhancing additives. The high lubricity of 5W-30 Semi Synthetic Engine Oil provides lower internal friction for reduced engine wear while the relatively low viscosity improves flow rates and hydraulic tappet performance during cold start and engine idling.

Benefits:	Applications:
------------------	----------------------

- Semi-synthetic formulation
- Stay in grade properties
- Excellent high and low temperature stability
- Improved fuel efficiency
- Improved oil consumption and emissions
- Superior performance to mineral based oils

5W-30 Semi Synthetic Engine Oil is suitable for normally aspirated and turbocharged engines. Suitable for engines that run on petrol or diesel fuels. Suitable applications include passenger cars and light commercials particularly modern vehicles. 5W-30 Semi Synthetic Engine Oil is miscible with synthetic and mineral based engine oils.

Typical Test Data:	Product Profile:
---------------------------	-------------------------

Density @ 15°C - 0.857
Flash Point °C – 212
Kinematic Viscosity cSt @ 100°C - 10.5
Kinematic Viscosity cSt @ 40°C - 66.4
Pour Point (°C) - -44
Total Base Number (mg KOH/g) - 9.20
Viscosity Index - 146
