THE ONLY OFFICIAL UK DISTRIBUTOR OF LAUNCH TECH DIAGNOSTIC AND WORKSHOP EQUIPMENT

X-431 EURO TAB III

Technicians can now get their hands on a newly developed, high-end vehicle diagnostic tool, the Launch X-431 Euro Tab III, featuring the new Smartlink® C VCI, an advanced module allowing for enhanced communication and functions.

Using the Android 9.0 operating system, Euro Tab III builds on the highly regarded Launch diagnostic technology, offering worldwide vehicle coverage, powerful diagnostics and numerous special functions.

Euro Tab III has 33 service and reset functions, and features Launch CarSet Electronic database powered by Haynes PRO; Launch guided diagnosis function; Optional ADAS calibration function and advanced coding and programming function.

Smartlink®C communicates directly with a vehicle for local diagnosis and remotely for Launch Super Remote Diagnosis (SRD). Smartlink®C is a new development that allows a technician to call on a remote service provider, who, using a Smartlink®B interface, will connect to the vehicle remotely and carry out almost any diagnostic or programming function, on any vehicle.

The Euro Tab III includes the Launch professional database fully integrated into the diagnostic software. This will take the user directly from the DTC to a step-by-step testing routine, leading to the fault code solution. The new Tab III comes complete with the Launch O2-1 four-channel oscilloscope, as well as the Launch TSGUN and four TPMS sensors.

balco NEW velomount™ 3280 + velospin™ 8380P

Since 1984

velomount 3280 Tyre Changer

The velomount 3280 is a super-duty, high-performance tyre changer with 10" to 28" clamping via Centre-Post. The Centre-Post design eliminates any external clamping of the rim, instead securing the rim via cone and shaft arrangement, similar to a wheel balancer.

velospin 8380P Fully Automatic 3D Wheel Balancer with pneumatic clamping

A top of the line wheel balancer, which guarantees speed, accuracy, and long life. 3D data entry is complimented by an impressive, full-colour TFT display and pneumatic clamping device, which removes the need for a manual locking handle and provides even better balancing accuracy through perfect centering on the cone.

balco i-Lign CCD

Tablet-based operation is becoming more and more popular

You can be free to take the 'readout' with you anywhere around the vehicle, you are not restricted to a single alignment 'station' and can use on multiple bays. In general everything is much more practical with a portable system. The new i-Lign CCD knocks the ball out of the park when it comes to functionality and capability vs the practicality offered up by a tablet-based aligner, and compromises on nothing with its deluxe 3-Point clamps and 8 camera technology.

- Compact, portable trolley houses ALL components, whilst providing 'dock' charging for the measuring heads when not in use
- Tablet operation means the operator can move freely and see live readings
- Automatic look-up of the EXACT vehicle by Reg No makes it super-fast
- 8 CCD technology
- Deluxe, Italian 3-Point Clamps
- 2 Year Warranty
